

## **CALFED/Category III Restoration Projects**

The following tables provide information on the ecosystem restoration projects funded under the CALFED Bay-Delta Program. These projects were initially selected through the Category III process. In 1996 the administrative function for Category III funds was shifted to the CALFED Bay-Delta Program's Restoration Coordination Program.

Three basic funding types are identified in the tables:

- F - 1998/99 Federal Bay-Delta Act Funds
- S - Proposition 204 State Funds
- O - Other funds, consisting primarily of Stakeholder funds

The amount funded reflects only the CALFED funded portion of the project. Many of the projects include cost sharing from other funding sources.
